

Resume Writing & Portfolio Building

Final Outcome Instructions - What Students Need to Do

Students will create a professional resume and a personal portfolio page that clearly present their skills, projects, and achievements to prospective employers. The final output must follow an ATS-friendly format, use a professional tone throughout, and present the portfolio content with clarity so that recruiters can quickly understand the student's capabilities.

Activity Requirements

- Draft a one-page resume including Contact Details, Career Objective/Summary, Education, Technical Skills, Projects, Certifications, and Achievements sections.
- Use an ATS-friendly format: standard section headings, no tables/columns/graphics, simple fonts (Calibri/Arial/Times New Roman), and consistent bullet formatting.
- Write 3–5 project descriptions using the action verb + task + result/impact structure
- Create a personal portfolio page (Notion, Google Sites, GitHub Pages, or Canva Website) showcasing at least 3 projects with descriptions, tools used, and links
- Include a short 'About Me' section on the portfolio highlighting career goals, key skills, and areas of interest.
- Add a Skills section on the portfolio categorised into Technical Skills, Tools/Platforms, and Soft Skills.

Submission Format

Students can submit:

- Document link + Portfolio page link (with access)

Guidelines & Structure

- Students list out all their projects, skills, and achievements first, then shortlist only the most relevant ones for the resume to keep it to one page.
- Students choose a clean, ATS-friendly resume template (no images, icons, or multi-column layouts) so the content can be parsed correctly by recruiter systems.

- Students write each project/experience line using strong action verbs and quantify the impact wherever possible.
- Students set up their portfolio page on a chosen platform, add the About Me and Skills sections first, then populate it with detailed project write-ups and links.
- Students cross-check that the resume and portfolio present consistent information, then Share Document link With access

Evaluation Criteria

- Professional Tone — clarity, formality, and correctness of language across resume and portfolio.
- ATS-Friendly Format — correct structure, standard headings, and parseable formatting of the resume.
- Portfolio Clarity — how clearly the portfolio communicates the student's projects, skills, and career direction.

Syllabus

- Resume fundamentals: sections, structure, and length conventions for freshers/entry-level candidates.
- ATS (Applicant Tracking System) basics: what recruiters' systems scan for and formatting pitfalls to avoid.
- Writing achievement-oriented bullet points using action verbs and measurable outcomes.
- Portfolio platforms overview: Notion, Google Sites, GitHub Pages, and Canva Website.
- Structuring a portfolio: About Me, Skills, Projects, and Contact sections.
- Showcasing projects effectively: descriptions, tools used, and linking to GitHub/live demos/certificates.
- Proofreading and tone: maintaining consistency and professionalism across both documents.
